In 2019, farmers in CHINA PLANTED 2 BIOTECH CROPS, including cotton and papaya.

In 2018, 7 MILLION FARMERS IN CHINA planted biotech cotton.

Farmers in China have benefited from the technology through high yields and significant cost savings on insecticide application, as well as on labor use in spray application. China is estimated to have enhanced farm income from biotech cotton by US$23.2 billion from 1997 to 2018 and by US$1.5 billion in 2018 alone.
